EDUCATION

University of Guilan

Sep 2019 – Feb 2024

B.Sc. in Computer Engineering

Rasht, Iran

- CGPA: 3.69/4.0 (16.29/20)
- GPA of last year: 4.0/4.0 (18.88/20)

RESEARCH EXPERIENCE

Nasal Fracture Diagnosis with Transfer Learning

In Progress (Feb 2024 - Present)

- Behrad Sadeghi, Dr. Seyed Abolghasem Mirroshandel
- Under the supervision of Dr. Mirroshandel, I am spearheading a research project aimed at diagnosing nasal fractures utilizing state-of-the-art models, including Vision Transformer (ViT), Caformer, and EfficientNet. This study is particularly novel and challenging due to the use of an original dataset that has not been previously explored in the existing literature. Despite these complexities, our fine-tuned models have already achieved an accuracy rate exceeding 85%. We are currently conducting extensive evaluations by applying various transformer architectures and cutting-edge models to our dataset to rigorously assess and document their performance metrics.

RESEARCH INTEREST

- Machine Learning
- Computer Vision
- Bioinformatics
- Trustworthy AI
- Deep Learning
- Medical Imaging
- Large Language Models(LLMs)
- Human-Computer Interaction (HCI)

SELECTED PROJECTS

Pothole Segmentation |

Pytorch/Yolo

- This project develops an advanced deep learning model, **YOLOv9**, for **detecting** and **segmenting** potholes in **images** and **video streams**. Using a custom dataset, the model was fine-tuned with optimized hyperparameters, achieving a **mAP50** of **0.807** and a **Mask mAP50** of **0.825**, highlighting its effectiveness.

Amazon Reviews |

Keras

- A machine learning model was trained on Amazon Reviews for **sentiment analysis**, with preprocessing steps including **tokenization**, stopword removal, **lemmatization**, and **stemming**. Logistic Regression was used, and the repository includes code for additional models like **BERT** and Simple Neural Networks.

AlzMRI-Net |

Pytorch

- The AlzMRI-Net project develops a deep learning model to classify MRI scans into **four Alzheimer's disease stages** using a fine-tuned **EfficientNet-V2-L** model with **transfer learning** in PyTorch. Techniques like mixed precision training and gradient accumulation improve performance. The model achieves a **99.19%** test accuracy, underscoring its effectiveness in Alzheimer's disease classification.

Credit Card User Clustering |

Scikit-Learn

- This project clusters and segments 9,000 credit card users based on 18 behavioral variables over six months. After preprocessing and dimensionality reduction with **PCA**, **K-Means** clustering groups users into four clusters, revealing distinct behavioral patterns.

WORK EXPERIENCE (Unpaid)

Machine Learning Engineer Intern

Feb 2023 – August 2023

Infinite Modern Technology

- Gained proficiency in data processing techniques and tools such as Pandas, Matplotlib, Seaborn, and NumPy. Acquired knowledge in machine learning concepts and algorithms, both supervised and unsupervised. Completed several projects:
- Predicting-Loan-Acceptance —
- Predictive-Modeling-of-Car-Prices —

Research Assistant

Nov 2023 – Present

University of Guilan

- I have worked on various datasets and papers under the supervision of Dr. Mirroshandel.
- Currently, I am focused on a paper titled **Nasal Fracture Diagnosis with Transfer Learning**, which involves a dataset collected by Dr. Mirroshandel himself that has not been previously explored in this field.

🏆 HONORS AND AWARDS

National undergraduate full scholarships, University of Guilan <i>Top 1% of 164,000 participants in the Iranian University Entrance Exam</i>	2019 – 2023
Announced as the Outstanding Student, University of Guilan <i>Achieving a 4.0 GPA in 4 out of 9 semesters.</i>	2019 – 2024
Member of the Scientific Association of Computer Engineering in University of Guilan <i>This Association consists of 6 members selected from all the students of the Computer Department</i>	2023 – 2024

⚙️ RELEVANT COURSEWORKS

- Intro to Machine Learning-Kaggle
- Pandas-Kaggle
- Natural language processing: 20/20
- Engineering Probability and statics: 19.75/20
- Advance Programming: 20/20
- Algorithm Design: 19.12/20

👤 TEACHING ASSISTANT EXPERIENCE

Artificial Intelligence <i>University of Guilan</i>	Fall 2022
<ul style="list-style-type: none">• Instructor: Dr. Y. Boreshban• As a Teaching Assistant, I was responsible for creating assignments, guiding students through projects, and producing informative videos about neural networks, all to foster optimal learning experiences and facilitate students' comprehension.	
Algorithm Design <i>University of Guilan</i>	Spring 2023
<ul style="list-style-type: none">• Instructor: Dr. A. Khozaei• I designed and assessed assignments for students so they were able to implement complex algorithms.	
Software Testing <i>University of Guilan</i>	Spring 2023
<ul style="list-style-type: none">• Instructor: Dr. F. Feyzi• My only responsibility was to assess the students' assignments.	

✂️ SKILLS

Programming Languages: Python, SQL, Java, C++,HTML
ML Frameworks: PyTorch, TensorFlow, Huggingface, LangChain Keras, Scikit-learn
Data Science Tools: Power BI, Numpy, Pandas, Matplotlib, Seaborn, Scipy, Excel
Extra Tools and Technologies: Linux, Git, Docker, Latex
Operating Systems : Linux, MacOS, Windows
Technical Expertise : Machine Learning, Deep Learning, LLMs, Computer Vision, Trustworthy AI, Medical imaging

🗣️ LANGUAGES

English: Overall band score **7.0** in the IELTS test : Reading(8.5), Listening (7.5), Speaking(6.5), Writing (6)
Persian: Native Language
